## PROJECTS

### Automated Scheduling and Smart Reminders for Event Management

Mar 2025 - Ongoing

- **Abstract:** Developing an automated system to streamline scheduling and reminders for effective event planning. The solution aims to reduce errors and manual effort while enhancing user experience through seamless event planning and notifications.
- **System & tools:** React.js for the front-end, Python with flask for the back-end, MongoDB for the database, Python with Celery and Redis for task scheduling, Postman for API testing, Twilio API for notifications, and Google Calendar API for scheduling.

### Internship Tracker and Recommendation system

Jan 2025 – Mar 2025

- **Abstract:** A web-based system for students to submit internship details with geo-tag uploads and for faculty to approve them via dashboards. Includes CSV report generation and internship recommendations. Streamlines tracking while reducing manual workload.
  - **System & tools:** HTML, CSS, Bootstrap for front-end UI; Python with Flask for the backend; MongoDB Atlas for the database; Flask-Login for authentication; Python CSV module for report generation; File handling for geo-tag uploads; and Postman for API testing.
